

I have now reproduced the error after including Client Session Id and Request Execution Id in the logging, as you requested. This is the error I get, including the stack trace:

2018-09-26 16:07:29,821 [15] ERROR

ReutersIntegration.DSS.PriceExtractors.SecurityIntradayPriceExtractor - Report id 324281107: An error occurred while processing file Intraday.5min.csv
ReutersIntegration.DSS.DssException: An error occurred while extracting contents of file Intraday.5min.csv - VjF8fDQxMzkyODg0OA - Client session id: d92cd043-1259-4061-a723-c07c060fdf6a,

Request correlation id: 3b962a88-4db6-4150-8fb3-dbc321efdd68 --->

ThomsonReuters.Dss.Api.NotFoundException: ExtractedFile of id 'VjF8fDQxMzkyODg0OA' not found.

Once again, the file in question processes just fine when retrying 15 seconds later.
Hopefully this is enough to get you started - I will work on producing an executable
except of the code tomorrow.
